

Curriculum Vitae

Personal Information

Name: George David Tsitlauri
Profile: AI & Systems Research Engineer
Date of Birth: 14 October 2003
Email: gdtsitlauri@gmail.com

Education

2026-2027: Master in Artificial Intelligence & Applications, University of Thessaly, Greece.
2021-2026: Bachelor in Informatics & Telecommunications, University of Thessaly, Greece.
Specialization: Data Management and Artificial Intelligence
Research Laboratory: Computer Architecture, Compilers and System Security

Languages

Greek Native
Russian Native
English ECCE - University of Michigan

Research

Crypto3DStackCPU Secure CPU prototype with a 4-layer 3D-stacked-memory abstraction.
CUDA-zkML GPU-accelerated zero-knowledge proofs for verifiable neural inference.
Kronos Causal-inspired generalization robust to unseen shifts and severe shortcut reversal.
Nous Self-improving LLM framework with reasoning loops for limited compute.
PATV-X Training-free, explainable deepfake-video detection via frequency analysis.
Asclepius Explainable multimodal biosignal AI for anomaly detection and federated health.
Atlas Simulated cloud autonomy with digital twins, orchestration and intelligent control.
Olympus AI security platform for threat simulation, reverse engineering, and malware analysis.
Odyssey Risk-aware intrusion-detection framework for post-quantum transition environments.
Gate-6G Adaptive 6G-style transmission via semantic communication and split inference.

Academic Projects

CryptoCPU (Thesis) Design and implementation of an encrypted instruction set processor on FPGA (Prof. G. Dimitriou).
IR Optimizer Intermediate-representation analysis and optimization for the CCC compiler.
GPBFT Group-based PBFT consensus evaluated in SymbChainSim.
Autoscaler Kubernetes weather app with autoscaling and load-aware deployment.
Nexus Compiler platform with MIPS generation, CPU simulation, parallelism and HDL tests.

Websites

Skyrianos Skyros island website with visitor information.
OstrichZooPark Ostrich Zoo Park website with visitor information.
Pavlidis Home E-commerce website for online product presentation and storefront workflows.

Skills

Programming Python, C, C++, Java, SQL, JavaScript, TypeScript, Assembly, VHDL, Verilog, Go, C#, Scala, R, MATLAB
AI PyTorch, TensorFlow, XGBoost, Apache Spark, Apache Hadoop
Hardware CUDA, OpenMP, TensorRT, Xilinx Vivado, Vitis HLS
Web HTML5, CSS3, React, Next.js, Node.js, Tailwind CSS
Dev Git, CI/CD, Linux, Windows, Bash, CMake, Docker, Kubernetes, Wireshark, PostgreSQL, FastAPI, Jupyter, LaTeX
